

1 **CLAIMS:**

2
3 What is claimed is:

4
5 1. A confectionary display device, comprising
6 an edible first member;
7 at least an edible indicia that is received by said first member and maintained thereon in a
8 secure manner such that said indicia is viewable by an intended recipient.

9
10 2. The device of Claim 1, wherein said first member is substantially rigid.

11
12 3. The device of Claim 2, wherein said first member is substantially planar.

13
14 4. The device of Claim 2, wherein said first member is of a shape selected from a group
15 consisting of square, triangle, circle, rectangle, pentagon, hexagon, and octagon.

16
17 5. The device of Claim 2, wherein said first member is comprised of an outer shell that
18 encloses an inner substance therein.

19
20 6. The device of Claim 5, wherein said outer shell is a hard candy material.

21
22 7. The device of Claim 5, wherein said inner substance is made of a substance selected
23 from chocolate and jelly gum confectionary.

1
2 8. The device of Claim 1, wherein said member is in the shape of a tablet.

3
4 9. The device of Claim 8, wherein said indicia is selected from a group consisting of a
5 hard candy, jelly gum confectionary, hard gum confectionary.

6
7 10. The device of Claim 9, wherein said indicia becomes sticky upon application of
8 water to said indicia.

9
10 11. The device of Claim 8, wherein an adhesive means is used to attach said indicia to
11 said member.

12
13 12. The device of Claim 11, wherein said adhesive means consists of an edible tacky
14 substance that may be applied to a covering of said indicia.

15
16 13. The device of Claim 11, wherein said adhesive means consists of a mixture of sugar,
17 syrup, and baking powder.

18
19 14. A confectionary device for relaying a message, the device comprising:
20 a first edible member having a substantially rigid nature;
21 a plurality of edible indicia being received on said first member and retained thereon in a
22 secure manner such that said indicia is viewable by an intended recipient;
23 whereby a user may place any desired indicia onto said first member to relay a desired

1 message.

2
3 15. The device of Claim 14, wherein said first member is in a tablet form of sufficient
4 size to accommodate a plurality of said indicia and is made of a hard candy material.

5
6 16. The device of Claim 14, wherein said indicia is selected from a group consisting of a
7 hard candy, jelly gum confectionary, and hard gum confectionary.

8
9 17. The device of Claim 16, wherein said plurality of indicia become sticky upon
10 application of water to said plurality indicia, thereby attaching the plurality of indicia to said first
11 member.

12
13 18. The device of Claim 15, wherein an adhesive means consisting of a mixture of sugar,
14 syrup, and baking powder is applied to a covering on said indicia and thereby attaches said
15 plurality of indicia to said first member.

16
17 19. A confectionary device for relaying dynamic messages, the device comprising:
18 a first edible member having a substantially rigid nature, and said first member being in
19 the form of a tablet;

20 a plurality of edible indicia being received on said first member and retained thereon in a
21 secure manner such that said indicia is viewable by an intended recipient and consumable
22 thereby;

23 an attaching means for attaching said indicia to said first member;

whereby a desired arrangement of indicia are easily applicable onto said first member to relay a desired message to an intended recipient.

20. The device of claim 19, wherein said indicia is selected from a group consisting of a hard candy, jelly gum confectionary, and hard gum confectionary.
